Sir:

RESPONSE

In response to the Examiner's requirement for election of species, Applicant elects "activin". Claims readable on the elected species include 20, 21, 22, 24, 25, 26 and 27. Attention is directed to the fact that the specification discloses that activin itself is to be considered as "stimulator of activin" as referred to in claim 20 (see, for example, the third paragraph on page 2 of the specification).

This election is made with traverse and the Examiner is requested to reconsider the requirement for election. It is respectfully submitted that a thorough search of the relevant art would necessarily encompass all of the enumerated species. Accordingly, no undue burden would be placed on the Examiner from a searching perspective if the requirement for election were to be withdrawn.
